Table of Contents

Introduction	1	Authortime Versus Runtime	44
Part I: Getting Started		An ActionScript 2 Primer	45
1 Exploring Flash 8	9	Typing Variables	46
What's New in Flash 8	9	Flash's Classpath	46
Expressive Features	9	The Import Statement and Namespaces	48
Video Improvements	12	Sample Project Template	50
Workflow Improvements	13	Planning for the End Product First	50
Flash Player	15	Building a Template	53
Flash Professional 8 and Flash Basic 8	17	Understanding Other Project Variations	55
ActionScript Additions	17	Final Thoughts	57
A Programming Primer	17	@work resources	61
The flash.filters Package	21		
The flash.display.BitmapData Class	22	Part II: Projects	
The flash.geom Package	22	3 Creating a Video with Synchronized Captions	61
The flash.external.ExternalInterface Class	24	About the Projects	61
The flash.net Package	26	Prerequisites	61
Final Thoughts	27	Planning the Projects	62
2 Producing a Flash Project	29	Cue Points and Captions	62
Flash's File Structure	29	Cue Point Types	62
Timeline Animation	30	Embedded Cue Points Versus Separate Text Files	64
Movie Clip Hierarchy	32	Project: Navigation Cue Points in a .flv File	65
Selecting	34	Creating a New .fla File	66
Modular Delivery	36	Importing the Source Video	66
ActionScript	39	Choosing Video Options	66
Library Items	40	Adding the First Navigation Cue Point	67
Disabling Export in First Frame	41	Adding More Navigation Cue Points	69
		Skinning the Video	69
		Navigating the Video	70

Project: ActionScript Cue Points for Captions in an XML File	70
Preparing to Use the Offline Gathering Tool	70
Loading the Video and Transcript into the Gathering Tool	71
Setting Cue Points While the Video Plays	71
Exporting the XML File	72
Project: Basic Caption Display Template	73
Creating a captionType1.fla File ..	74
Adding the Minimum Code	74
Creating the .swf File	75
Project: Channeling Cue Points to the Caption Display	75
Creating the main.fla File	76
Creating the CaptionHolder Symbol	76
Assembling Support Class Files ..	77
Implementing the Final Code ..	78
Alternative 1: Making the Video Play Automatically	79
Alternative 2: Adding a Second captionText1.swf That Supports Navigation Cue Points	79
Project: Code for Audio-only Captions	80
Capturing the Cue Points	80
Creating the main_audio.fla File	81
Assembling Support Files	81
Writing the Code	81
Alternative: Using the MediaPlayer Component ..	82
Project: Advanced Captioning Template	84
Creating the captionType2.fla File	84
Nesting the Text in a Clip	84
Modifying the Code to Move the Text	85
Publishing and Testing	86
Adding Code for the Hide/Reveal Feature	87
Creating the Hide/Reveal Button	88
Project: Synchronized Images Template	88
Encoding the Video	89
Preparing to Gather Cue Points	89
Creating an Animated Sequence	89
Gathering the Cue Points	90
Implementing the ActionScript in imagesTemplate.fla	92
Entering the ActionScript in main_coffee.fla	92
Testing main_coffee.fla	94
Exploring the Support Classes	94
Final Thoughts	96
@work resources.....	97

About the Project	97
Prerequisites	97
Planning the Projects	98
Media Selection	98
Internal Versus External	99
Stage Layout	100
Communication Gateways	101
Project: Media Preparation	102
Resizing Images	102
Preparing the Thumbnails	102
Tagging the Images	103
Project: Main Framework and Minimum Support Templates	104

Creating the Main File	105	Modifying the Main File to Run chapters_hardwired.swf	126
Creating a Holder for the ProgressBar Clip	105	Creating the chapters_ homemade fla File	127
Entering Image Information ..	105	Writing the Code for chapters_homemade fla	127
Entering Template Information	107	Modifying the Main File to Run chapters_homemade.swf	129
Instantiating the PhotoController	107	Project: Advanced Thumbnail Templates	130
Creating a Simple Display Template	108	Creating the Clip-based Horizontal Thumbnail Template	131
Creating a Simple Thumbnails Template	109	Entering the Code for thumbnailsH_clip fla	132
Coding the Thumbnails Template	111	Using main_tester_app.swf to Test Your Template	136
Testing It	113	Creating the thumbnailsH_linkage fla Template	137
Creating the Simple Chapters Template	113	Modifying the Code for the thumbnailsH_linkage fla File	138
Including the Chapters Template and Testing	115	Creating the thumbnailsH_import fla Template	139
Project: Advanced Display Templates	116	Entering the Code for thumbnailsH_import fla	139
Creating the display_slide fla File	116	Creating Vertical Thumbnail Templates	140
Writing the Code for display_slide fla	117	Project: Externalized Image Information	141
Modifying the Main File to Run display_slide.swf	119	Creating and Populating the images.xml File	141
Creating the display_fade fla File	120	Creating the main_external fla File	142
Writing the Code for display_fade fla	120	Coding the main_external fla File	143
Modifying the Main File to Run display_fade.swf	123	Explore the Class Structure	145
Project: Alternative Chapter Templates	124	Final Thoughts	146
Creating the chapters_ hardwired fla File	124	@work resources.....	149
Writing the Code for chapters_hardwired fla	124		

5 Creating an Assessment Quiz	149
About the Project	149
Prerequisites	149
Planning the Projects	150
Writing Effective Questions	150
Designing Question Templates	151
Client-side Versus Server-side .	153
Planning for Extensibility	153
Project: Quiz Content	154
Studying the XML Format	155
Writing Sample Content for multipleChoiceSingle	155
Writing Sample Content for multipleChoiceMultiple	156
Writing Sample Content for hotSpot	157
Writing Sample Content for dragAndDrop	157
Project: Starter Template	158
Creating the Starter File	159
Placing Text on the Stage	159
Entering Skeleton Code	159
Publishing	161
Modifying the quiz.xml File ...	161
Testing the Quiz Engine	162
Project: Multiple-Choice/Single Answer Template	163
Creating the multipleChoiceSingle fla File	163
Laying Out the Stage	163
Adding the RadioButton Component	163
Changing the ActionScript	163
Testing the multipleChoiceSingle Template	166
Project: Multiple-Choice/Multiple Answer Template	167
Creating the multipleChoiceMultiple fla File	167
Laying Out the Stage	167
Adding the CheckBox Component	168
Changing the ActionScript	168
Testing the multipleChoiceMultiple Template	170
Project: A Hotspot Template	170
Creating the hotSpot fla File ..	171
Laying Out the Stage	171
Modifying the File's Contents .	171
Changing the ActionScript	173
Testing the hotSpot Template ..	176
Project: Drag-and-Drop Template ..	177
Creating the dragAndDrop fla File	177
Laying Out the Stage	177
Changing the ActionScript	177
Testing the dragAndDrop Template	179
Project: Results Template	179
Creating the results fla File	180
Laying Out the Stage	180
Building a Simple Results Template	180

About the Author

Phillip Kerman has been teaching Flash since version 3 and writing books since version 5. He also does contract development. His early experiences in photography have a direct correlation to his job today. The feeling he gets when seeing a project he assembles come to life is the same as watching a photograph develop in the dark-room.

Although he understands that great projects involve the work of many dedicated people, he's not shy to point out that he was the primary programmer for such familiar projects as the original Millennium Three site (archived at deepplay.com/sites/m399/), a real-time Flash auction that consistently sells over \$5 million in cattle during a typical 90-minute sale (stampdecattle.com), the site for the "other" cool office chair (www.allsteeloffice.com/number19/movie.asp), and the Witness to History kiosk featured in the Communication Arts 11th Annual Interactive Exhibition (commarts.com/ca/interactive/cai05/36_ia05.html).

The short story of Phillip's rise from mere mortal to being in charge of everything at phillipkerman.com LLC goes like this:

- ▶ Student photographer for Sunset High School's newspaper and yearbook
- ▶ Rode his bicycle from Portland, Oregon, to go to college in Rochester, New York (and got all 2 years' worth of physical education credits waived in the process)
- ▶ Graduated from the Rochester Institute of Technology with a bachelor of science in imaging and photographic technology
- ▶ Worked for Sinar Bron, Inc., selling premier professional photographic equipment
- ▶ Worked for The Human Element, Inc., doing Authorware (version 1) development
- ▶ Drove back to Portland, Oregon, where he has been doing contract work for more than 10 years

Dedication

This book is dedicated to my good friend of 25 years, Graham Stewart Clark (1964–2005). Graham was a brilliant, inspiring, and strong human being who fought and lost a silent battle against overwhelming unhappiness. May his suicide persuade us of the importance of seeking help for ourselves and those we love.

For my friend, a city planner who dreamed of creating a more livable city, will you the reader consider giving your car a rest once in a while and instead walk, ride a bike, or take public transportation?

Acknowledgments

It's fair to say this book would be much different if no one helped me write it. In fact, I suspect it would be *bad*.

General acknowledgements, like those that follow, help reduce the chances of leaving anyone out. The people at Macromedia are always accessible and responsive. In the case of the Flash 8 team, though, they outdid themselves with a great product and a super-effective beta process. I've tried listing specific Macromedians in my other books' acknowledgements and, even when the list contains more than 100 people, I inevitably forget someone (so I'm not going to risk that here).

The folks at Sams Publishing are also super-dedicated and professional. For better or worse, they're unlike any of my other clients. They really approach a book as a partnership in which everyone can help make it better. Not once have I felt that a negotiation (big or small) was resolved unfairly.

If you've ever tried teaching, you won't be surprised to hear me acknowledge all the students who have taught me something. You tend to find out what you don't know very quickly when you teach. And, as is true with many other challenges, there is always room to improve your teaching ability. In recent years, I've learned from students and other teachers at Cleveland High School, Northwest Academy, Pacific Northwest College of Art, Portland Community College, and West Linn High School.

There are also people who provided specific help with certain portions of the book. Burak Kalayci (www.buraks.com)—whose ActionScript Viewer (ASV) and Captionate products are enough to deserve special recognition—provided valuable insights into how to design the projects for Chapter 3, “Creating a Video with Synchronized Captions.” He also graciously reviewed some other portions of the book. A former student, Jhon Adams (www.evilpumpkin.com), created the PHP components for Chapter 6, “Saving and Evaluating Quiz Results,” and Chapter 10, “Building a Photo Share Application.” My sister, Deborah Kerman, provided expert advice on the question-writing tips in Chapter 5, “Creating an Assessment Quiz.” Jesse Warden (www.jessewarden.com) also graciously reviewed a chapter early on, which helped me to map out other projects. Scott Huber tested several chapters' functionality. The prolific Flash author Robert Reinhardt (www.themakers.com) gave me lots of general feedback over the weeks (well, months) it took me to write this book.

Finally, I've seen some authors acknowledge musical artists (presumably those who influenced the author while writing). Instead, let me mention the killer stereo accessory called squeezebox (from www.slimdevices.com) that gave me an easy way to listen to music while writing.

We Want to Hear from You!

As the reader of this book, *you* are our most important critic and commentator. We value your opinion and want to know what we're doing right, what we could do better, what areas you'd like to see us publish in, and any other words of wisdom you're willing to pass our way.

You can email or write me directly to let me know what you did or didn't like about this book—as well as what we can do to make our books stronger.

Please note that I cannot help you with technical problems related to the topic of this book, and that due to the high volume of mail I receive, I might not be able to reply to every message.

When you write, please be sure to include this book's title and author as well as your name and phone or email address. I will carefully review your comments and share them with the author and editors who worked on the book.
